AUTHOR INDEX

Agee, R.D.
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Arnold, C., Jr.
Development of a Polyol Cured Ferric Acetylacetonate Catalyzed Polybutadiene Urethane Adhesive, p.3

Arnold, R.L.
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Bell, J.P.
Calculation of Distribution of Oligomers and Free Diisocyanate in Urethane Prepolymers, p. 377

Boustany, K.
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Brownlee, J.L.
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Bruins, P.F.
A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Buchanan, R.A.
Controlling Particle Size and Structure of Starch Xanthide in Elastomer Masterbatches, p. 82

Causa, A.G.
A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Chung, D.A.
Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

Coleman, J.F.
Castable Reinforced Elastomers II. New Processing Methods, p. 185

Critchfield, F.E.
Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

Cunningham, W.K.
The Phenotropins — Novel Methylene Donors, p. 261

Dizon, E.S.
Performance Characteristics of Present-Day Tread Blacks, p. 414

Doane, W.M.
Controlling Particle Size and Structure of Starch Xanthide in Elastomer Masterbatches, p. 82

Finelli, A.F.
Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

Fleming, R.A.
A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Gerkin, R.M.
Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

Gras, D.
Continuous Processing of Rubber Compounds, p. 309

Russell, C.R.
Controlling Particle Size and Structure of Starch Xanthide in Elastomer Masterbatches, p. 82

Schary, E.
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Schollenberger, C.S.
Thermoplastic Polyurethane Elastomer UV Stabilization, p. 11

Scott, C.E.
Performance Characteristics of Present-Day Tread Blacks, p. 414

Seckinger, H.L.
Controlling Particle Size and Structure of Starch Xanthide in Elastomer Masterbatches, p. 82

Semin, R.E.
New Automotive Power Transmission Belt Concepts, p. 322

Sheard, E.A.
A New Composite Tire for Moderate Speed Applications, p. 358

Siebert, A.R.
Castable Reinforced Elastomers I. Material Properties, p. 177

Stanhope, H.W.
Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Stewart, F.D.
Thermoplastic Polyurethane Elastomer UV Stabilization, p. 11

Sugerman, G.
A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Tolbert, T.L.
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Trexler, H.E.
Elastomer Blends: Dependence of Properties on the Nature of the Polymers and the Cure Systems, p. 453

Voehringer, E.
Continuous Processing of Rubber Compounds, p. 309

Vorachek, J.J.
A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Walker, J.
New Compounding Techniques for Improved Hose Performance, p. 96

Weir, R.J.
New Compounding Techniques for Improved Hose Performance, p. 96

West, J.R.
The Contribution of Carbon Black Type To Skin And Treadwear Resistance, p. 278

White, W.W.
Design of SBR Latexes for Various End Applications, p. 475

SUBJECT INDEX

Abrasion Resistance
Performance Characteristics of Present-Day Tread Blacks, p. 414

Adhesion
Design of SBR Latexes for Various End Applications, p. 475

The Phenotropins — Novel Methylene Donors, p. 261

Adhesive
Development of a Polyol Cured, Ferric Acetylacetonate Catalyzed Polybutadiene Urethane Adhesive, p. 3

Adhesive Activated Polyester
Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Adhesive Formula
Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Agglomeration
Greater Profitability in the Manufacture of Belts and Hose by the Use of High Quality Polymeric Dispersions of Critical Chemicals, p. 339

Applications, Hose
Hose Design for Unusual Hose Applications, p. 403

Applicator Design
Microwave Energy for High Speed, Efficient Vulcanization of Extruded Rubber, p. 191

Automotive Accessory Drives
New Automotive Power Transmission Belt Concepts, p. 322

Automotive Parts
Progress in RIM Technology, p. 141

Belts
Greater Profitability in the Manufacture of Belts and Hose by the Use of High Quality Polymeric Dispersions of Critical Chemicals, p. 339

Belts, Transmission
New Automotive Power Transmission Belt Concepts, p. 322

Blacks, Carbon
The Contribution of Carbon Black Type to Skid and Treadwear Resistance, p. 278

Blending
Elastomer Blends: Dependence of Properties on the Nature of the Polymers and the Cure Systems, p. 453

Bonding Agent
The Phenotropins — Novel Methylene Donors, p. 261

Bumpers
Progress in RIM Technology, p. 141

Carbon Black
The Contribution of Carbon Black Type to Skid and Treadwear Resistance, p. 278

Carpet Construction
Design of SBR Latexes for Various End Applications, p. 475

Casing, Radial Tire
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Cast Urethane Elastomers
Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

Castable Elastomers
Castable Reinforced Elastomers II. New Processing Methods, p. 185

Castable Rubbers
Castable Reinforced Elastomers I. Material Properties, p. 177

Cellulose Fibers
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Centrifugal Casting
Castable Reinforced Elastomers II. New Processing Methods, p. 185

Chain Extension Reaction
Polyurethane Emulsions, p. 210

Colloidal Characteristics
Design of SBR Latexes for Various End Applications, p. 475

Colloidal Properties
Performance Characteristics of Present-Day Tread Blacks, p. 414

Composite Materials
Polyurethane Emulsions, p. 210

Composites
The Phenotropins — Novel Methylene Donors, p. 261

Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Composite Tires
A New Composite Tire for Moderate Speed Applications, p. 358

Compounding
The Contribution of Carbon Black Type to Skid and Treadwear Resistance, p. 278

New Compounding Techniques for Improved Hose Performance, p. 96

A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Microwave Energy for High Speed, Efficient Vulcanization of Extruded Rubber, p. 191

The Phenotropins — Novel Methylene Donors, p. 261

Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Compounds, Rubber
Continuous Processing of Rubber Compounds, p. 309

Compression Set
Elastomer Blends: Dependence of Properties on the Nature of the Polymers and the Cure Systems, p. 453

Continuous Filling Equipment
A New Composite Tire for Moderate Speed Applications, p. 358

Continuous Processing
Continuous Processing of Rubber Compounds, p. 309

Conveyor Belts
Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Cords, Tire
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Coupling Agent
A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Couplings
High Pressure Thermoplastic Hose Replaces Rubber, p. 50

CTBN
Castable Reinforced Elastomers I. Material Properties, p. 177

Castable Reinforced Elastomers II. New Processing Methods, p. 185

Cure Rate
Development of a Polyol Cured, Ferric Acetylacetonate Catalyzed Polybutadiene Urethane Adhesive, p. 3

New Compounding Techniques for Improved Hose Performance, p. 96

Cure Systems
Elastomer Blends: Dependence of Properties on the Nature of the Polymers and the Cure Systems, p. 453

Curing
Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

A New Composite Tire for Moderate Speed Applications, p. 358

Design, Hose
Hose Design for Unusual Hose Applications, p. 403

Design Parameters
Hose Design for Unusual Hose Applications, p. 403

Diisocyanate
Calculation of Distribution of Oligomers and Free Diisocyanate in Urethane Prepolymers, p. 377

Discontinuous Fibers Bonding
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Dispersion
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Dispersion, Polymeric
Greater Profitability in the Manufacture of Belts and Hose by the Use of High Quality Polymeric Dispersions of Critical Chemicals, p. 339

Drive System
New Automotive Power Transmission Belt Concepts, p. 322

Driving Surface
New Automotive Power Transmission Belt Concepts, p. 322

Dynamic Adhesion Test
A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Economics, Processing
Improved Processing Economics Through Scorch Control, p. 381

Elastomers
Development of a Polyol Cured,

Ferric Acetylacetonate Catalyzed Polybutadiene Urethane Adhesive, p. 3

Progress in RIM Technology, p. 141

Elastomer Blends
Elastomer Blends: Dependence of Properties on the Nature of the Polymers and the Cure Systems, p. 453

New Compounding Techniques for Improved Hose Performance, p. 96

Elastomeric Matrices
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Emulsions
Polyurethane Emulsions, p. 210

Energy
Microwave Energy for High Speed, Efficient Vulcanization of Extruded Rubber, p. 191

Engines, Automotive
New Automotive Power Transmission Belt Concepts, p. 322

Epoxy Resin
Castable Reinforced Elastomers I. Material Properties, p. 177

Castable Reinforced Elastomers II. New Processing Methods, p. 185

EVK Principle
Continuous Processing of Rubber Compounds, p. 309

Extenders
Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

A new Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Extruding
New Compounding Techniques for Improved Hose Performance, p. 96

Extrusion
Continuous Processing of Rubber Compounds, p. 309

High Pressure Thermoplastic Hose Replaces Rubber, p. 50

Microwave Energy for High Speed, Efficient Vulcanization of Extruded Rubber, p. 191

Fabric
Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Fascia
Progress in RIM Technology, p. 141

Fatigue Resistance
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Fiber Growth
Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Fibers, Cellulose
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Filament Yarn
Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Filler Dispersion
Improved Processing Economics Through Scorch Control, p. 381

Fillers
A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Film Properties
Polyurethane Emulsions, p. 210

Flat-Proof Tires
A New Composite Tire for Moderate Speed Applications, p. 358

Flatspotting
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Flex Requirement
Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

Flexing Applications
Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

Fracture
A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Gel Permeation
Calculation of Distribution of Oligomers and Free Diisocyanate in Urethane Prepolymers, p. 377

Glass Transition
Nuclear Magnetic Resonance Studies of Molecular Relaxation Mechanisms in Polymers, p. 60

Hose
Greater Profitability in the Manufacture of Belts and Hose by the Use of High Quality Polymeric Dispersions of Critical Chemicals, p. 339

Hose, Applications
Hose Design for Unusual Hose Applications, p. 403

Hose, Design
Hose Design for Unusual Hose Applications, p. 403

Hose, Performance
New Compounding Techniques for Improved Hose Performance, p. 96

Hose, Thermoplastic
High Pressure Thermoplastic Hose Replaces Rubber, p. 50

Idler, Floating
New Automotive Power Transmission Belt Concepts, p. 322

Impact Resistance
Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

In Situ Reinforcement
Castable Reinforced Elastomers I. Material Properties, p. 177

Castable Reinforced Elastomers II. New Processing Methods, p. 185

Isopleths
The Contribution of Carbon Black Type to Skid and Treadwear Resistance, p. 278

Liquid Reaction Molded Urethanes
Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

Liquid Rubber
Castable Reinforced Elastomers I. Material Properties, p. 177

Castable Reinforced Elastomers II. New Processing Methods, p. 185

A New Composite Tire for Moderate Speed Applications, p. 358

Main Chain Motions
Nuclear Magnetic Resonance Studies of Molecular Relaxation Mechanisms in Polymers, p. 60

Metering
Progress in RIM Technology, p. 141

Methylene
The Phenotropins — Novel Methylene Donors, p. 261

Microcellular Elastomers
Progress in RIM Technology, p. 141

Microwave Energy
Microwave Energy for High Speed, Efficient Vulcanization of Extruded Rubber, p. 191

Mixing
Continuous Processing of Rubber Compounds, p. 309

Greater Profitability in the Manufacture of Belts and Hose by the Use of High Quality Polymeric Dispersions of Critical Chemicals, p. 339

New Compounding Techniques for Improved Hose Performance, p. 96

Progress in RIM Technology, p. 141

Mixing Cycle
Improved Processing Economics Through Scorch Control, p. 381

Moderate Speed Applications
A New Composite Tire for Moderate Speed Applications, p. 358

Modulus
Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Mold Gating
Progress in RIM Technology, p. 141

Molecular Motion
Nuclear Magnetic Resonance Studies of Molecular Relaxation Mechanisms in Polymers, p.60

Molecular Weight
Calculation of Distribution of Oligomers and Free Diisocyanate in Urethane Prepolymers, p. 377

Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

NMR Relaxation
Nuclear Magnetic Resonance Studies of Molecular Relaxation Mechanisms in Polymers, p. 60

Non-Rubber Components
Greater Profitability in the Manufacture of Belts and Hose by the Use of High Quality Polymeric Dispersions of Critical Chemicals, p. 339

Nuclear Magnetic Resonance
Nuclear Magnetic Resonance Studies of Molecular Relaxation Mechanisms in Polymers, p. 60

Nylon Hose
High Pressure Thermoplastic Hose Replaces Rubber, p. 50

Nylon 66
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Oil Swell
Elastomer Blends: Dependence of Properties on the Nature of the Polymers and the Cure Systems, p. 453

Oligomers
Calculation of Distribution of Oligomers and Free Diisocyanate in Urethane Prepolymers, p. 377

Open Casting
Castable Reinforced Elastomers II. New Processing Methods, p. 185

Organo-titanate Technology
A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Oscillatory Shear Test
A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Paper Coating
Design of SBR Latexes for Various End Applications, p. 475

Particle Size
Controlling Particle Size and Structure of Starch Xanthide in Elastomer Masterbatches, p. 82

Particle Structure
Controlling Particle Size and Structure of Starch Xanthide in Elastomer Masterbatches, p. 82

Performance Characteristics
Performance Characteristics of Present-Day Tread Blacks, p.414

Phenotropins
The Phenotropins — Novel Methylene Donors, p. 261

Physical Parameters
Performance Characteristics of Present-Day Treat Blacks, p. 414

Physical Properties
Elastomer Blends: Dependence of Properties on the Nature of the Polymers and the Cure Systems, p. 453

Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

High Pressure Thermoplastic Hose Replaces Rubber, p. 50

Improved Processing Economics Through Scorch Control, p. 381

A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

The Phenotropins — Novel Methylene Donors, p. 261

Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Polyurethane Emulsions, p. 210

Progress in RIM Technology, p. 141

Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Pick Data
Design of SBR Latexes for Various End Applications, p. 475

Pneumatic Tires
A New Composite Tire for Moderate Speed Applications, p. 358

Polybutadiene
Development of a Polyol Cured, Ferric Acetylacetonate Catalyzed Polybutadiene Urethane Adhesive, p. 3

Polycarboxylic Acid
Polyurethane Emulsions, p. 210

Polyester
Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Polymeric Dispersions
Greater Profitability in the Manufacture of Belts and Hose by the Use of High Quality Polymeric Dispersions of Critical Chemicals, p. 339

Polymers
Elastomer Blends: Dependence of Properties on the Nature of the Polymers and the Cure Systems, p. 453

A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Nuclear Magnetic Resonance Studies of Molecular Relaxation Mechanisms in Polymers, p. 60

Powdered Rubber
Continuous Processing of Rubber Compounds, p. 309

Prepolymers
Calculation of Distribution of Oligomers and Free Diisocyanate in Urethane Prepolymers, p. 377

Prevulcanization Inhibitors
Improved Processing Economics Through Scorch Control, p. 381

Processing Economics
Improved Processing Economics Through Scorch Control, p. 381

Processing Parameters
New Compounding Techniques for Improved Hose Performance, p. 96

Properties, Dynamic Mechanical
Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

Reaction Injection Molding (RIM)
Progress in RIM Technology, p. 141

Reinforcement
Castable Reinforced Elastomers I. Material Properties, p. 177

Castable Reinforced Elastomers II. New Processing Methods, p. 185

Hose Design for Unusual Hose Applications, p. 403

Microwave Energy for High Speed, Efficient Vulcanization of Extruded Rubber, p. 191

A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

The Phenotropins — Novel Methylene Donors, p. 261

Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Rotational Casting
Castable Reinforced Elastomers I. Material Properties, p. 177

Castable Reinforced Elastomers II. New Processing Methods, p. 185

Rubber Composites
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Rubber Compounds
Continuous Processing of Rubber Compounds, p. 309

Hose Design for Unusual Hose Applications, p. 403

Rubber, Extruded
Microwave Energy for High Speed, Efficient Vulcanization of Extruded Rubber, p. 191

Rubber Formulations
Polyester Fabric Reinforcement for Conveyor Belts, p. 249

Santoweb Composites
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

SBR Latexes
Design of SBR Latexes for Various End Applications, p. 475

Scorch Control
Improved Processing Economics Through Scorch Control, p. 381

Serpentine Belt System
New Automotive Power Transmission Belt Concepts, p. 322

Shear Development
Performance Characteristics of Present-Day Tread Blacks, p. 414

Shearing
A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Short Fibers Rubber Composites
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Skid Resistance
The Contribution of Carbon Black Type to Skid and Treadwear Resistance, p. 278

"Soft Face" Concept
Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

Stabilizers
Thermoplastic Polyurethane Elastomer Stabilization, p. 11

Starch
Controlling Particle Size and Structure of Starch Xanthide in Elastomer Masterbatches, p. 82

Starch Xanthide
Controlling Particle Size and Structure of Starch Xanthide in Elastomer Masterbatches, p. 82

Styrene-Butadiene Rubber
Controlling Particle Size and Structure of Starch Xanthide in Elastomer Masterbatches, p. 82

Temperature
Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

Microwave Energy for High Speed, Efficient Vulcanization of Extruded Rubber, p. 191

Tensile Strength
The Contribution of Carbon Black Type to Skid and Treadwear Resistance, p. 278

Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160

Test, Dynamic Adhesion
A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Thermoplastic Hose
High Pressure Thermoplastic Hose Replaces Rubber, p. 50

Thermoplastic Organics
A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Thermoset Organics
A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Throughput Rates
Improved Processing Economics Through Scorch Control, p. 381

Tire Casing
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Tire Cords, Steel
A Steel Tire Cord Oscillatory Shear Dynamic Adhesion Test, p. 431

Tires, Composite
A New Composite Tire for Moderate Speed Applications, p. 358

Tires, Solid Industrial
Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

Titanate Agents
A New Coupling Agent for Extenders, Fillers and Reinforcements Used in Polymers, p. 30

Toxicity
The Phenotropins — Novel Methylene Donors, p. 261

Transmission Belts
New Automotive Power Transmission Belt Concepts, p. 322

Tread Blacks
Performance Characteristics of Present-Day Tread Blacks, p. 414

Treadwear
The Contribution of Carbon Black Type to Skid and Treadwear Resistance, p. 278

Performance Characteristics of Present-Day Tread Blacks, p. 414

Twist Levels
Reinforcement of Radial Tire Casing With Nylon 66, p. 236

Ultraviolet Stabilization
Thermoplastic Polyurethane Elastomer Stabilization, p. 11

Urethanes
Development of a Polyol Cured, Ferric Acetylacetonate Catalyzed Polybutadiene Urethane Adhesive, p. 3

Flex Requirement of Cast Urethane Elastomers for Solid Industrial Tires, p. 116

A New Composite Tire for Moderate Speed Applications, p. 358

Polyurethane Emulsions, p. 210

Progress in RIM Technology, p. 141

Urethanes, Liquid Reaction Molded
Dynamic Mechanical Properties of Liquid Reaction Molded Polyurethanes, p. 396

Urethane Prepolymers
Calculation of Distribution of Oligomers and Free Diisocyanate in Urethane Prepolymers, p. 377

Urethane Stability
Thermoplastic Polyurethane Elastomer Stabilization, p. 11

Urethane Structure
Thermoplastic Polyurethane Elastomer Stabilization, p. 11

Vulcanization
Microwave Energy for High Speed, Efficient Vulcanization of Extruded Rubber, p. 191

Vulcanizing Profiles
Continuous Processing of Rubber Compounds, p. 309

Young's Modulus
Short Fibers Rubber Composites: The Comparative Properties of Treated and Discontinuous Cellulose Fibers, p. 160
